Claims 1 and 22-46 are presented for examination.

Applicants' amendment and declaration filed January 24, 2003 have been received and entered.

Claim Rejections - 35 U.S.C. § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 22-46 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicants' specification does not show any methods of treating at least one of diabetes and complication arising from diabetes in a subject in need of such treatment with a mixture of polyactic acids having a condensation degree of 3 to 19, a method of preventing diabetes in a subject with the mixture, a method of preventing complications arising from diabetes with the mixture or a method of reducing the blood sugar level in a subject with the mixture.

Claims 22-46 are not allowed.

Art Unit: 1614

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 22-41 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Again, applicants' specification does not contain any test results or experimental data showing the instant medicament will, in fact, prevent diabetes or diabetes complications especially in a mammal not presently at risk of or predisposed to developing such a disease.

Applicants' declaration under 37 CFR 1.132 submitted on January 24, 2003 regarding the 35 U.S.C. 112, first paragraph rejection is not persuasive since the declaration only shows results of a subject (a model mouse) with moderately high blood sugar level (possessing the disorder or complication already). Clearly the declaration shows the instant mixture is used to prevent any further complications or prevent the reoccurrence of the diabetes or diabetes complications in a subject already having the disorder.

To overcome this rejection, the applicants may wish to amend the claims by inserting the phrase --in need thereof--, in claims.

Claims 1 and 22-41 are not allowed.

Art Unit: 1614

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is again rejected under 35 U.S.C. 102(b) as being anticipated by Youichirou et al., of record, for reason of record as set forth in the previous Office action at page 3 as applied to claims 1-21.

Applicants' remarks regarding the prior art does not teach the instant medicament (composition) are not persuasive since prior art does teach the instant active ingredient, a cyclic and straight-chain mixed poly L-lactic acid having 3-19 degree condensation is old in the art. Note applicants are not entitled to procure claims based on discovery that well-known and old compounds can be adapted to new uses; to entitle him to a patent, the compounds must be both new and unobvious to one skilled in the art. (See In re Hack 114 USPQ 161)

Claim 1 is not allowed.

Art Unit: 1614

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
